

## Bud's iOS Technical Test.

The point of this task is to demonstrate your thinking process, the way you approach this test is completely up to you.

What we need you to demonstrate:

- Thinking process
- Reusability code

## Coding Style

In Bud, we follow SOLID and KISS principles and all of our code are testable.

### Tasks:

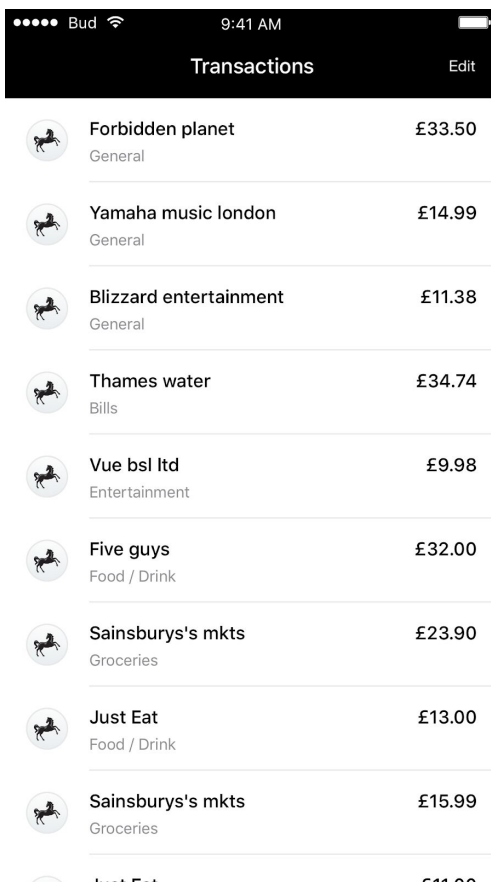

1. Retrieve Transactions from endpoint: <http://www.mocky.io/v2/5b36325b340000f60cf88903>
2. Display them according to the provided design.
3. Implement *Edit* functionality, where the user can select multiple cells (as in design) and tap the *Remove* button to remove the selected cells.

*Note:* Please, contact us if the endpoint doesn't work.

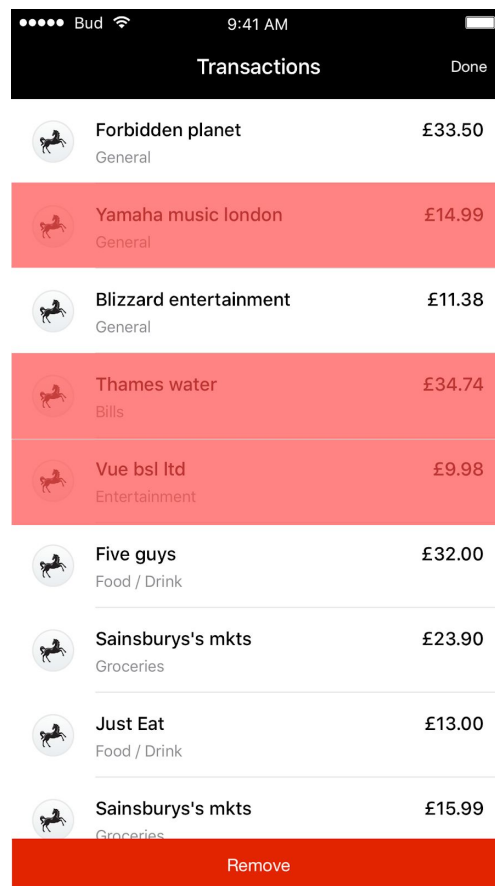

### Conclusion:

Once you've completed the test, please upload the project to GitHub and send us the link

## Design

Transactions		Edit
	Forbidden planet General	£33.50
	Yamaha music london General	£14.99
	Blizzard entertainment General	£11.38
	Thames water Bills	£34.74
	Vue bsl ltd Entertainment	£9.98
	Five guys Food / Drink	£32.00
	Sainsburys's mkts Groceries	£23.90
	Just Eat Food / Drink	£13.00
	Sainsburys's mkts Groceries	£15.99
	Just Eat Food / Drink	£11.00
